

MASTER OF SCIENCE IN MANAGEMENT

LOGISTICS MANAGEMENT

2024-25 Program Information

School of Graduate and Professional Studies

MASTER OF SCIENCE IN MANAGEMENT (MSM) **LOGISTICS MANAGEMENT**

The Master of Science in Management is a highly focused, fast-paced program that provides students with skills in the functional areas of business along with essential executive and leadership skills. This 10-course, 30 credit hour program is specifically designed for individuals who are current or aspiring leaders in nearly any sector. MSM students learn how to communicate effectively, lead organizational change, maximize human resources, and compete globally. The MSM curriculum is comprised of seven (7) graduate business core courses plus three (3) courses from one of the three (3) MSM concentrations.

The Logistics Management concentration will prepare you for a career in designing and managing business processes, either directly (V.P. of Ops, COO) or indirectly (e.g., management consulting). Develop skills for managing interfaces between operations and other business functions such as finance, marketing, managerial accounting and human resources.

COURSE DESCRIPTIONS

Ethical Leadership - MANG6113

An examination of current theories and practices of leadership, along with an exploration of the thesis that effective and ethical leadership lies in a commitment to universal moral principles, including justice, integrity, and compassion. Challenges to this thesis are also examined.

Organizational Behavior - MANG6023

A systematic examination of psychological and sociological variables that are important in the comprehension of individual motivation, the managing of groups, interpersonal relationships, and organizational effectiveness, as well as creativity and leadership within the organization.

Strategic Management - MANG6043

A capstone study of how firms formulate, implement, and evaluate strategies. Students study strategic management concepts and techniques used to chart the future direction of different organizations. The major responsibility of the student is to make objective strategic decisions based on an integrated perspective of the program curriculum and to justify their decisions through oral and written communication.

Budgets and Forecasting in Organizations - MANG6063

A systematic examination of psychological and sociological variables that are important in the comprehension of individual motivation, the managing of groups, interpersonal relationships, and organizational effectiveness, as well as creativity and leadership within the organization.

Global Business - MANG6093

An intensive course designed to give a thorough understanding of the important dimensions of conducting business internationally. Students will gain an appreciation of the complexities associated with international business including: the importance of cultural differences, choice of modes of entry, strategic marketing strategies, strategic human resource strategies, and important international business theories.

Legal Issues in Management - MANG6123

A course designed to give students an understanding of the legal concepts, rights, obligations and liabilities faced in the business environment. This course focuses on the arena in which commercial transactions occur and the legal issues that arise with these transactions. It is the goal of this course to prompt students to proactively consider legal issues among the decision dimensions when making a business decision.

Marketing Management - MARK6003

An introduction to the theory and practical application of marketing principles. Special emphasis is given to developing a framework for analyzing strategic marketing situations by defining target markets and developing a marketing mix related to the market stakeholders of the organization.

Operations Management - MANG-6103

A study of business processes, procedures and strategies used to transform inputs into finished goods and services. The course consists of two main components: a body of knowledge component and a critical thinking component.

Lean Process Management - MANG-6133

This course offers a practical introduction to lean management principles and techniques. It is tailored to help the student implement lean manufacturing in business environment to improve productivity, business resilience, and to reduce waste.

Supply Chain Management - MANG-6143

This course covers basic principles of supply chain management and provides techniques used to analyze various aspects of logistics systems. Key concepts such as inventory management, communication, warehousing, distribution, and facility location are examined as an integral part of modern business. The course addresses insights, concepts, practical tools, and decision support systems that are important for the effective management of the supply chain.

WHAT OUR STUDENTS ARE SAYING:

“MVNU has taught me so many skills both in and outside the classroom that I will carry with me into the future as this chapter ends. My MVNU education has given me the knowledge and confidence needed to be a strong and Godly businesswoman.”

HANNAH HINERMAN

Master of Business Administration, 2019
